

Unite your patient data in the OR and beyond.

Many challenges may arise in the operating room, but accessing and storing images shouldn't be one of them. Fujifilm Systems Integration, coupled with Fujifilm's VNA technology, allows you to integrate more specialties, more devices, and more data than any other system on the market—all from one central data repository.

Eliminate Silos. Enable Informatics.

Store images, videos, and associated metadata seamlessly to your repository (VNA, PACS, EMR, and more.) While integration is seamless with all vendors' systems, lower your cost of ownership by taking advantage of Fujifilm's Best in KLAS Synapse VNA and Synapse PACS.
