

Enable touchless control in your OR!

The COVID-19 crisis has created new and accelerated existing trends in healthcare -- including touchless control, active remote service, and teleconferencing. **Fujifilm Systems Integration** gives clinical and IT staff on-demand access, control, viewing and storage of data, delivering powerful toolsets to support the current COVID-19 health crisis:

Touchless Control
(routing, capture, PACS)

Contamination Risk Reduction

Speed up surface decontamination procedures by reducing the number of touchpoints to multiple systems through use of our central console.

Active, remote,
post-installation support

Onsite Vendor Service Reduction

Our remote technicians and engineers solve 68% of problems remotely before the problems present themselves in the OR.

Communicate in real-time,
remotely, limiting physical
movements.

Teleconferencing

Through a secure URL, your colleagues can have remote access to view your procedure through multi-cast video streaming capabilities with bi-directional audio.
